

Uncle Ed says

"I won't pay a lot for that electrode!"

Iontophoresis Electrodes for only \$3.25?? No way!

Here's some help from

HPMS

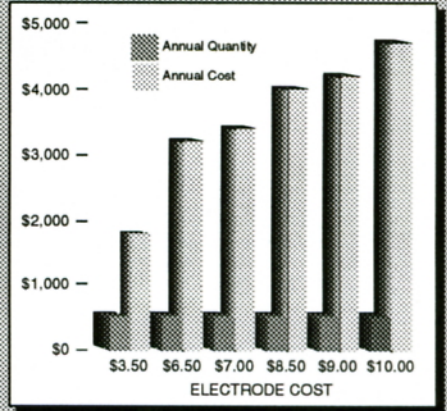

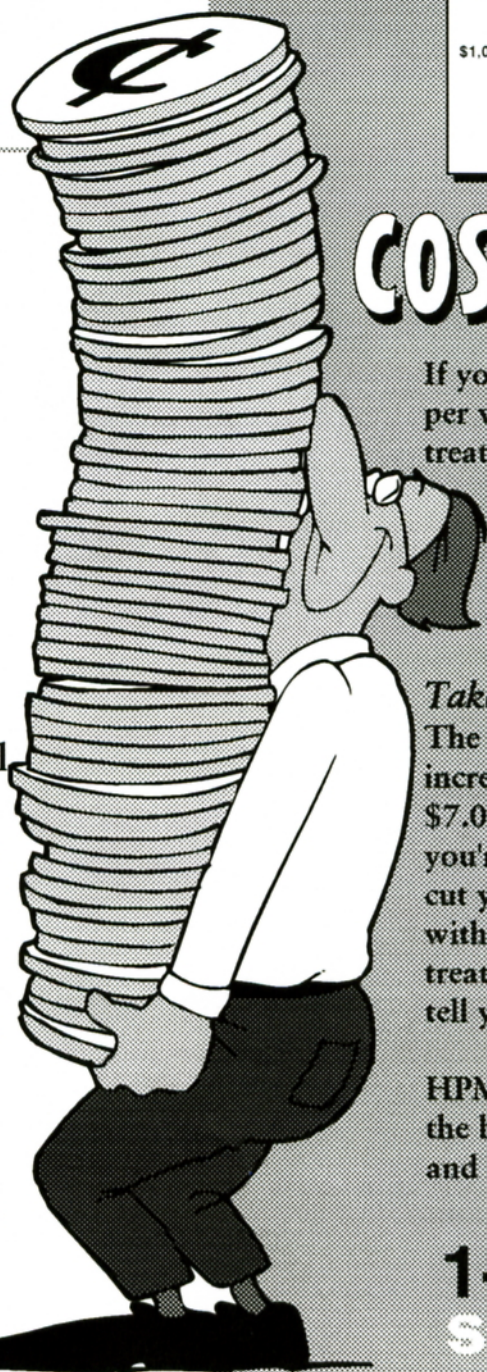

Are you confused about Iontophoresis electrode prices?

All the claims about buffers and electrode material seem immaterial when the electrode cost exceeds the reimbursement. If it hasn't yet happened to you, it will.

With Health Care Reform comes cost cutting measures. We will see this in the form of reduced reimbursements.

But don't worry. HPMS has taken measures to cut cost for you!

COST SAVINGS!!

If your iontophoresis patient load is 5 per week and each receives 2 treatments per week, that equals 480 treatments per year. The chart above shows the cost and savings represented by these numbers.

Take a look...
The chart represents how easy it is to increase your income. If you're paying \$7.00 for iontophoresis electrodes, you're paying too much. Let HPMS cut your electrode cost by up to 60% without compromising the quality of treatments. Give us a call and we'll tell you how.

HPMS...doing our best to give you the best Products, Service, Support and Price.
